

Margramar / Margramar
pelo mundo / around the world

MARGRAMAR

- 🏠 Jazidas próprias no sudeste e nordeste do país;
- 🚚 Transporte próprio;
- 🏭 Indústria de beneficiamento;
- 🌐 Centro de distribuição no Brasil.

Desde 1986 Tornando Possível.

—

- 🏠 *Own quarries in the southeast and northeast of the country;*
- 🚚 *Own transport system;*
- 🏭 *Processing industry;*
- 🌐 *Distribution center in Brazil.*

Since 1986 Making it Possible.

QUARRIES

Para atender a demanda e exigência do mercado, a Margamar está sempre pesquisando, descobrindo e explorando novas pedreiras. Inovação é a palavra que define nosso perfil de atuação no setor de Rochas Ornamentais.

To attend market demand and its requirements, Margamar is always researching, discovering and exploring new quarries. Innovation is the word that defines our profile in the Natural Stone industry.

PRECIOUS STONES

Raridade. Peças únicas e incomparáveis desenhadas pela natureza, podendo conter minerais preciosos em sua formação. Para ambientes únicos e luxuosos.

Rarity. Unique and incomparable pieces designed by nature, may contain precious minerals in its formation. For unique and luxurious projects.

Rareza. Piezas únicas e incomparables diseñadas por la naturaleza, pudiendo contener minerales preciosos en su formación. Para ambientes únicos y lujosos.

Brown Agata

Chemical Formula: SiO₂

Density: 2.6 Ton/m³

Mohs Hardness scale: 7.0

Slabs measurement:

2cm | 2,80 x 1,80m²

Black Agata

Chemical Formula: SiO₂

Density: 2.6 Ton/m³

Mohs Hardness scale: 7.0

Slabs measurement:

2cm | 2,80 x 1,80m²

Blue Agata

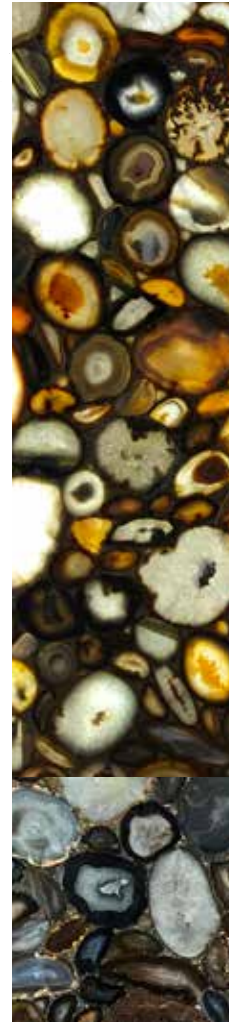

Chemical Formula: SiO₂

Density: 2.6 Ton/m³

Mohs Hardness scale: 7.0

Slabs measurement:

2cm | 2,80 x 1,80m²

Grey Agata

Chemical Formula: SiO₂

Density: 2.6 Ton/m³

Mohs Hardness scale: 7.0

Slabs measurement:

2cm | 2,80 x 1,80m²

Natural Agata

Chemical Formula: SiO₂

Density: 2.6 Ton/m³

Mohs Hardness scale: 7.0

Slabs measurement:

2cm | 2,80 x 1,80m²

OWN QUARRY

Jade

Material Type: Semiprecious Stone (Quartzite Polimitic Breccia)
Minerals Present: Quartz / Mica (Muscovite and Illite) / Feldspar / Kaolinite / Hematite / Fuchsite

Physical Indexes

Water Absorption [%]: 0.06
Apparent Porosity [%]: 0.112

Breccia

Material Type: Semiprecious Stone (Quartzite Oligomitic Breccia)
Minerals Present: Quartz / Talc / Mica / Feldspar / Cristobalite

Physical Indexes

Water Absorption [%]: 0.198
Apparent Porosity [%]: 0.523

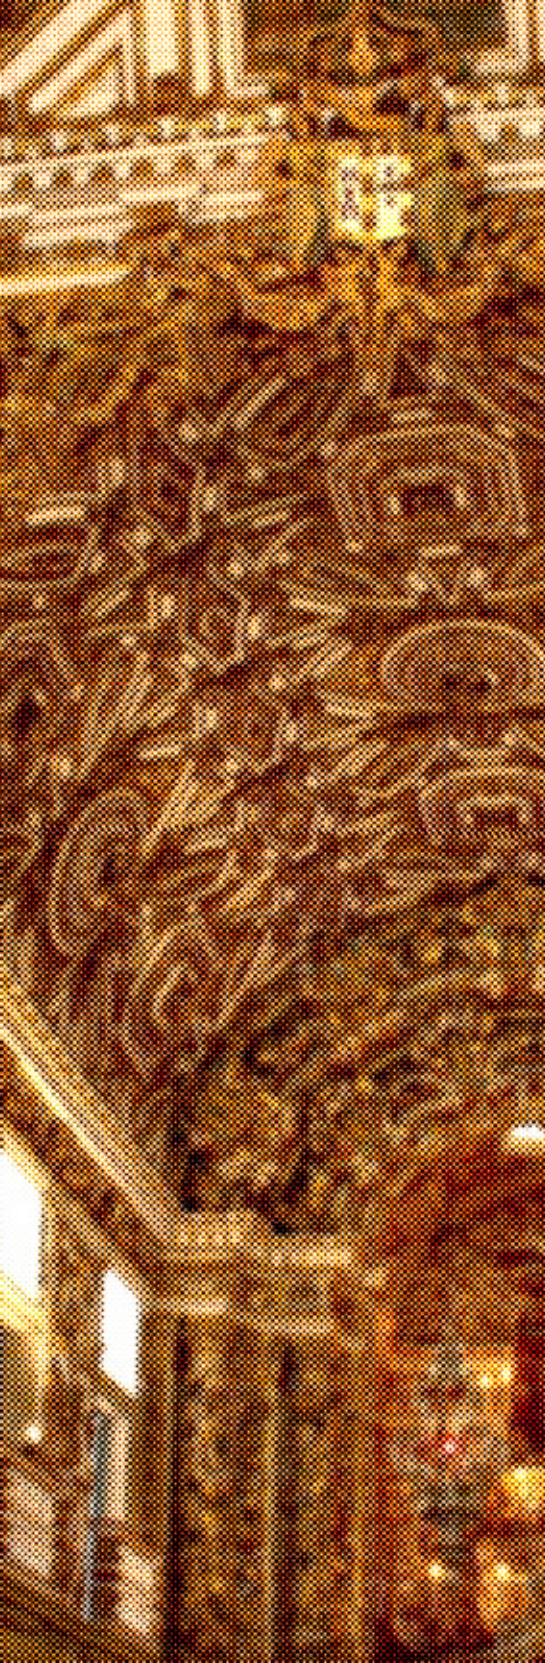

OWN QUARRY

Berillo

Material Type: Quartzite
Minerals Present: Quartz / Talc / Mica / Feldspar / Cristobalite

Physical Indexes

Water Absorption [%]: 0.04
Apparent Porosity [%]: 0.107

HIGH END

Exclusividade. Quartzitos selecionados, de alto padrão e de acesso limitado. Para ambientes exclusivos e imponentes.

Exclusivity. Selected quartzites, high standard and limited access. For exclusive and imposing projects.

Exclusividad. Quartzitos seleccionados de alto nivel y de acceso limitado. Para ambientes exclusivos y imponentes.

AURORA BOREALIS

OWN QUARRY

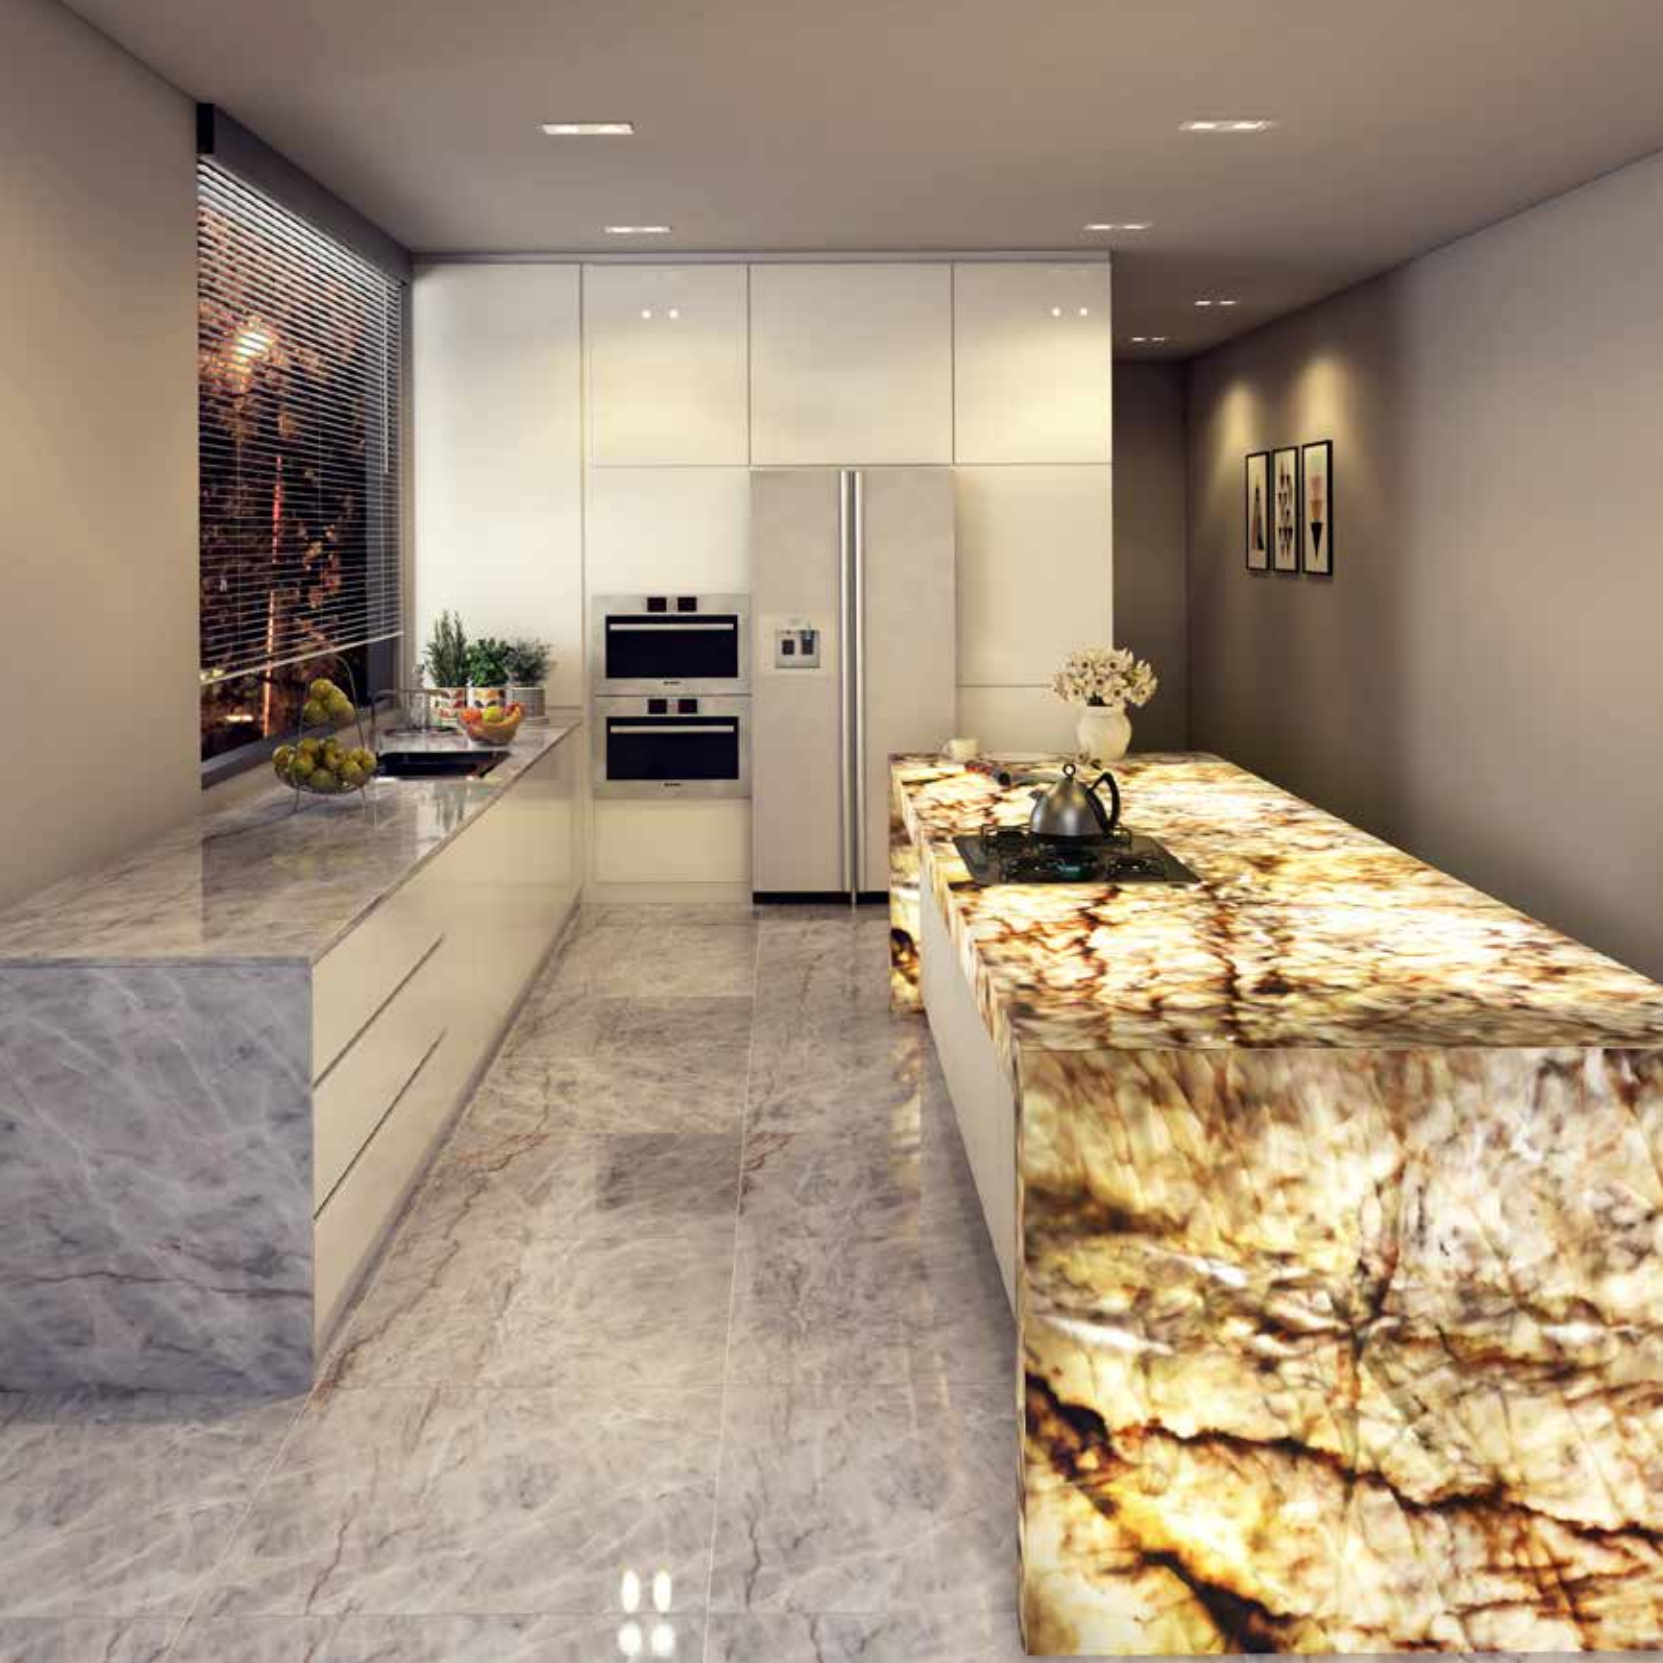

Material Type: Quartzite

Minerals Present: Quartz / Talc / Mica / Feldspar / Cristobalite

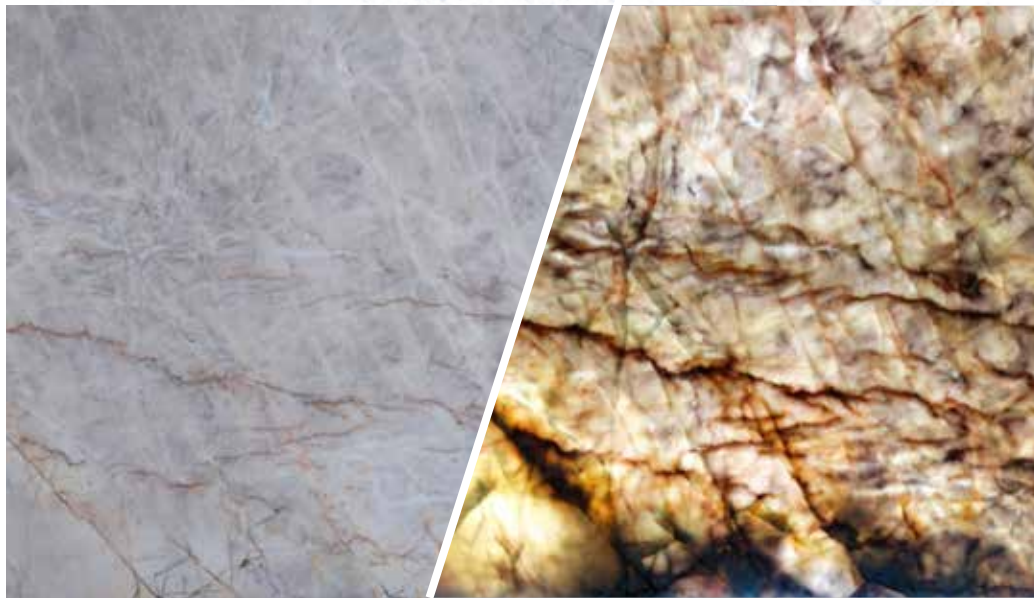

Physical Indexes

Water Absorption [%]: 0,04

Apparent Porosity [%]: 0,107

AUSTRAL ROYALE

OWN QUARRY

Material Type: Quartzite

Minerals Present: Quartz / Talc / Mica / Feldspar / Cristobalite

Physical Indexes

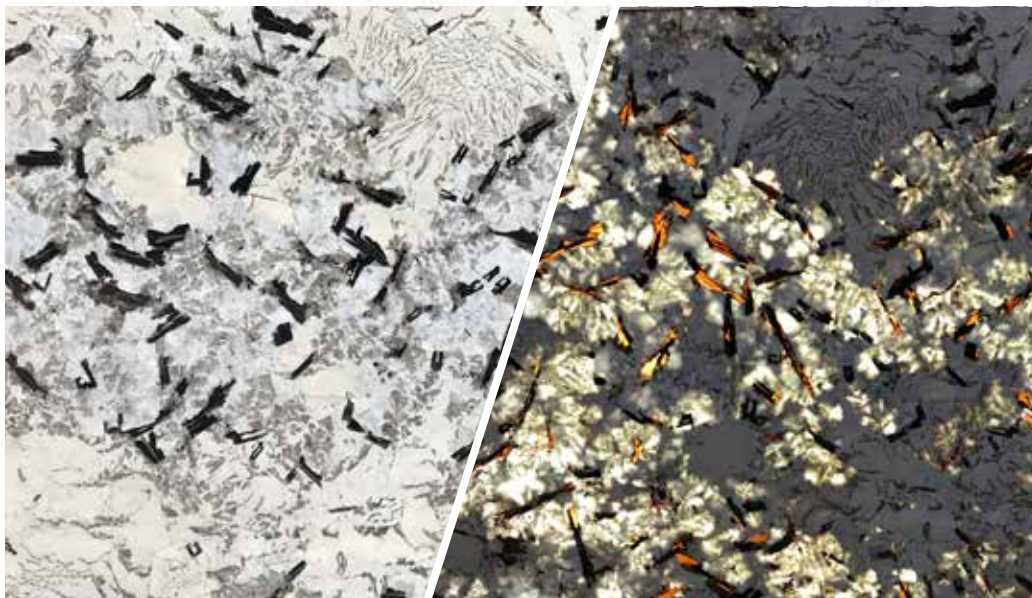

Water Absorption [%]: 0,198

Apparent Porosity [%]: 0,523

Translucent

SWISS ALPS

OWN QUARRY

Material Type: Feldspar (Granite)

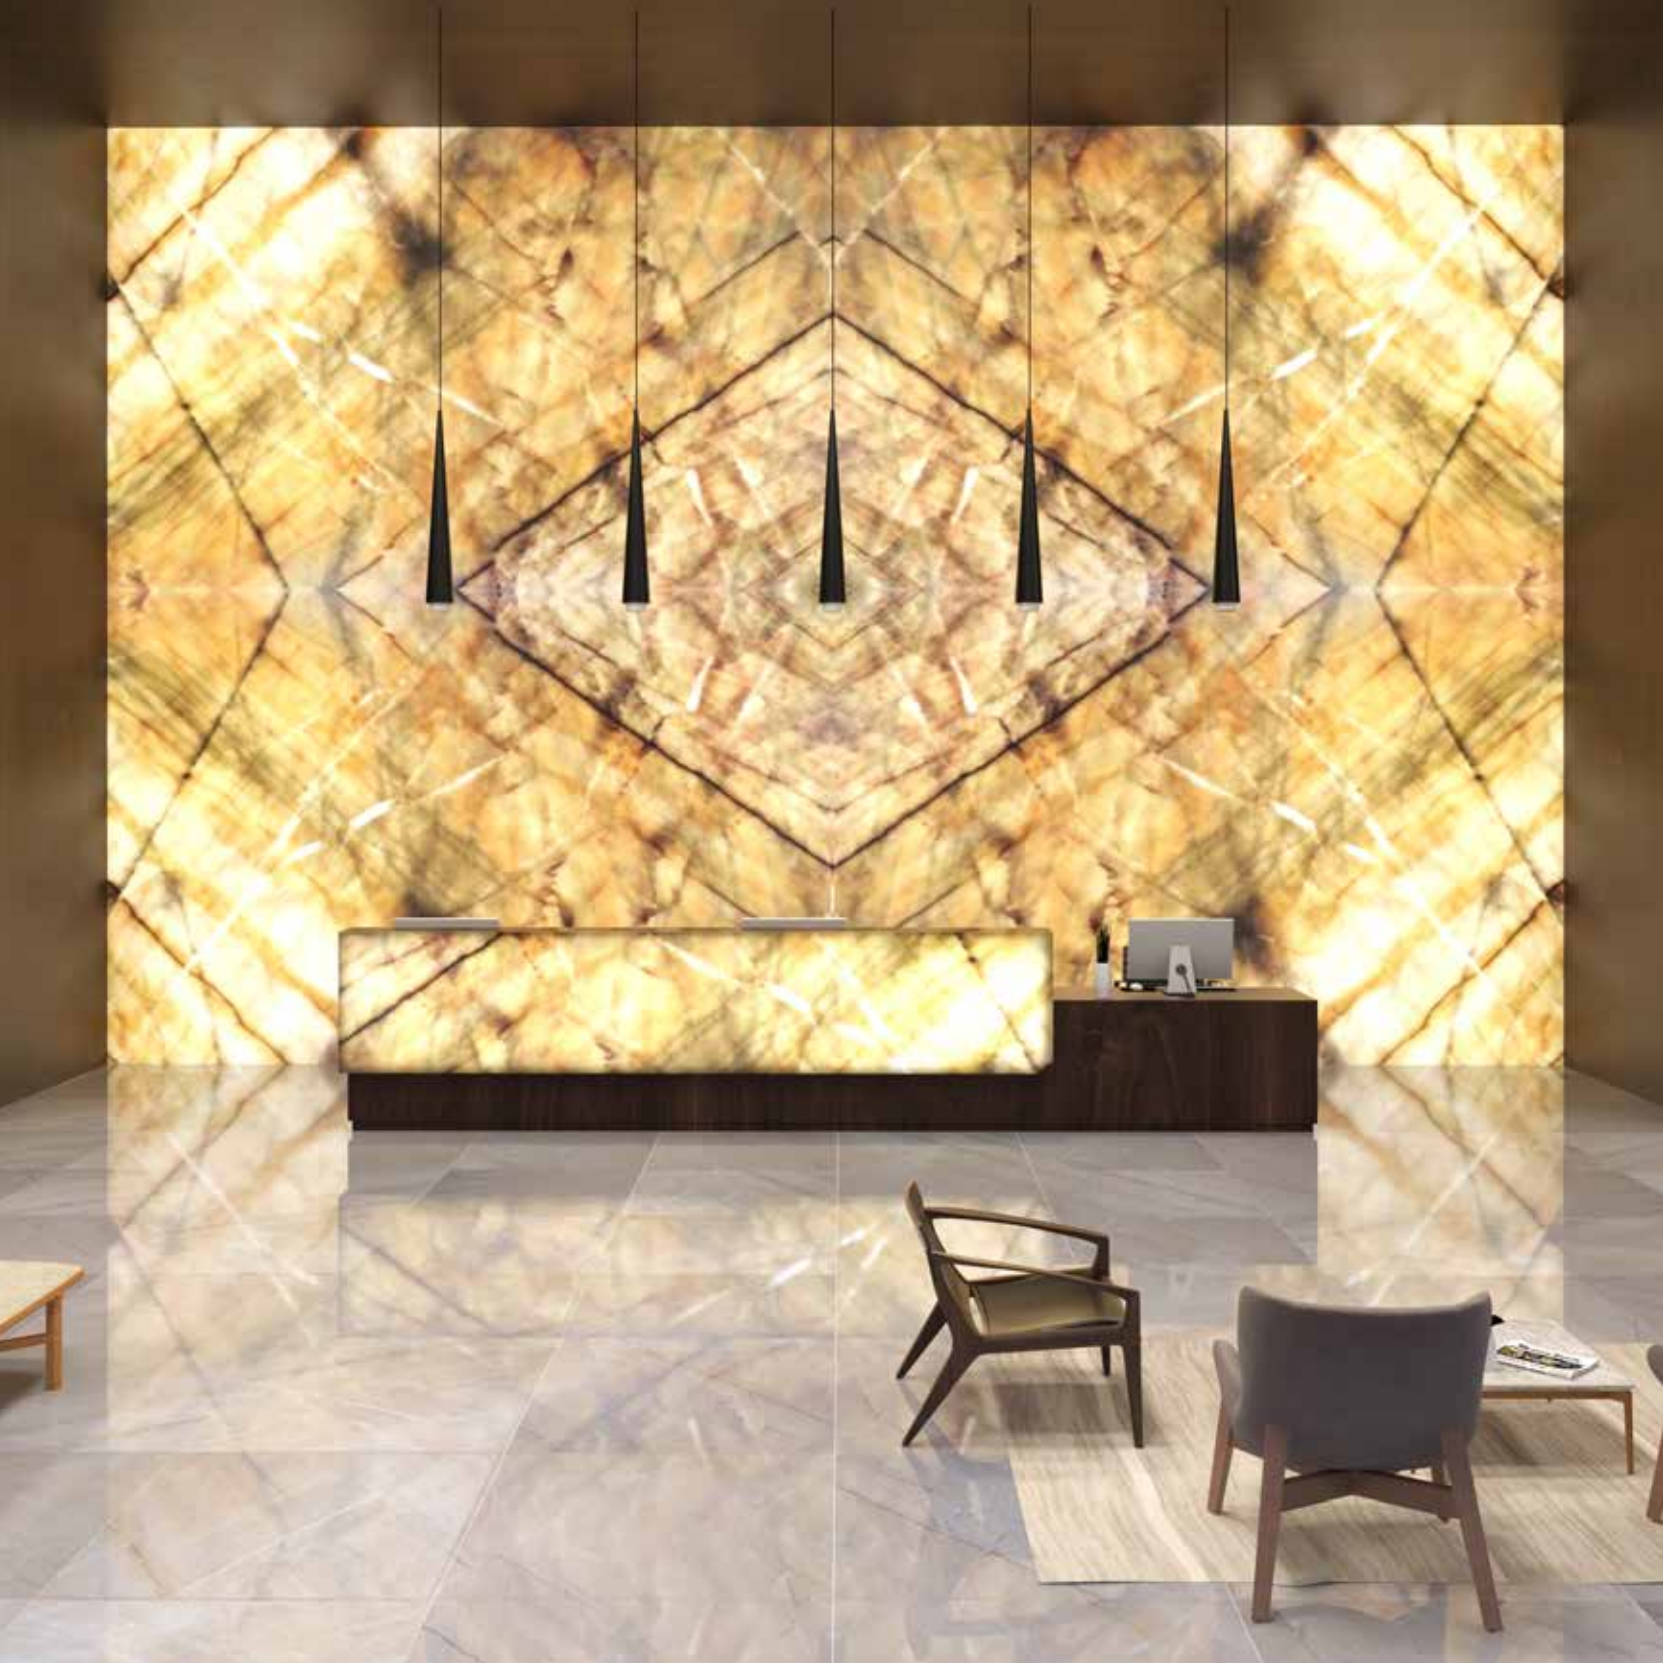

Minerals Present: Quartz / Muscovite / Biotite / Ortoclasio / Microcline

Physical Indexes

Water Absorption [%]: 0.287

Apparent Porosity [%]: 0.755

Translucent

ZURICH

OWN QUARRY

Material Type: Quartzite

Minerals Present: Quartz / Talc / Mica / Feldspar / Cristobalite

Physical Indexes

Water Absorption [%]: 0,198

Apparent Porosity [%]: 0,523

Translucent

HIGH-END ——— Vibranium

OWN QUARRY

Material Type: Quartzite

Minerals Present: Quartz / Muscovite

Physical Indexes

Water Absorption (%): 0,211

Apparent Porosity (%): 0,558

OWN QUARRY

Material Type: Quartzite

Minerals Present: Quartz / Minérios Metálicos

Physical Indexes

Water Absorption (%): 0,299

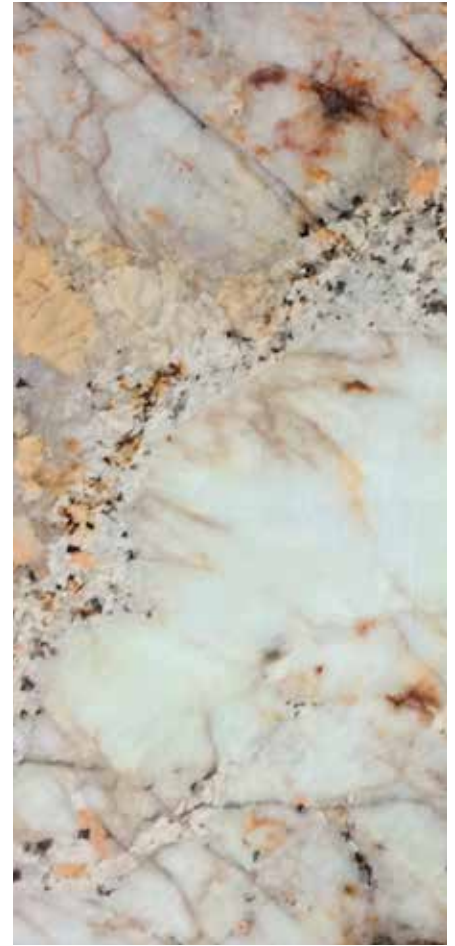

Apparent Porosity (%): 0,855
